

STANDARD MED PROTOCOLS FOR ALL INTAKES

De-Worming Standard

Kittens:

- Pyrantel Pamoate at 2 weeks (repeating weekly until switching to Drontal)
- Drontal at 6-8 weeks (2 doses, 2 weeks apart)

Adults:

- (2) Drontal doses- 2 weeks apart

**If fleas and Mites are also present, the Revolution given for that can substitute a Drontal dose

**Fenbendazole (Panacur) is a liquid and can be substituted for Drontal in difficult to pill cats after 6 weeks.

De-Flea Standard:

Capstar, followed by Frontline plus (or generic equivalent) should be used when fleas confirmed or suspected, unless ear mites are also present, in which case Revolution (or generic equivalent) should be used.

Coccidia prophylaxis:

Toltrazuril 5% at intake or at 3 weeks for kittens -1 TIME (dosage on bottle based on concentration)
