

STANDARD MED PROTOCOLS FOR ALL INTAKES

****NOTE: PLEASE use extreme caution on cats that are underweight or sick. Give only the very basics required (do not vaccinate , etc)**

De-Worming Standard

Kittens:

- Pyrantel Pamoate (liquid) at 2 weeks (repeating weekly until 8 weeks)
- 1 dose Praziquantel (liquid) at 8 weeks

Adults:

- 2 doses Pyrantel Pamoate (liquid) – 1 at intake, one 2-4 weeks later
- 1 dose Praziquantel (available in liquid or pill) at intake anytime from intake to vet time

****If fleas and Mites are also present, the Selegmetin / Sarolaner (Revolution Plus) (back of the neck topical) can be used instead of one Pyrantel dose.**

De-Flea Standard:

Nitenpyram (oral liquid), followed by Revolution Plus (Or generic equivalent) (back of neck topical)
(Over 4 weeks and 2 lbs)

Coccidia prophylaxis:

Toltrazuril 5% at intake or at 3 weeks for kittens -1 TIME (dosage on bottle based on concentration)
